

# Local Authority Case Study

Bedford Borough Council

## KEY TAKE OUTS:

Refurbishment Surveys

Bulk Sampling

Air Monitoring (after  
asbestos removal)

Long-term working  
relationship

Annual re-commission

## Surveying Commercial Property

Vintec have worked with Bedford Borough Council for many years on a range of asbestos inspection and testing services. The primary remit for Vintec's most recent contract with the Council was extremely varied, including both refurbishment and demolition surveys for their commercial properties. Additional services also provided include bulk sampling, and air monitoring after asbestos removal work. The diverse corporate assets that were part of the asbestos removal projects encompassed schools, offices, the town hall etc.

With extensive experience in surveying schools, sports clubs, libraries, and other local authority assets, Vintec understands the importance of ensuring the health and safety and welfare of those who access these facilities. This was at the centre of Vintec's approach, establishing strong relationships with key stakeholders. Our state-of-the-art in-house laboratory enables fast turnaround results, typically within 3-5 days, ensuring large scale projects, such as those undertaken with Bedford Borough Council, are completed on time and on budget.

Our longstanding relationship with Bedford Borough Council is a testament to our successful asbestos compliancy work with them. After many years of being annually re-commissioned, in 2018, the Council appointed Vintec with a 3-year contract for asbestos testing and compliance services – something we are extremely proud of!
